

H2O @ TMS!

TMS School Nurse Teacher, Mrs. Rocha is going to see her dream come true through our environmentally conscious students! Under the tutelage of their awesome Science teacher, Mrs. Brennan, students presented the impact that single use plastics have on our environment, during a recent Parent Teacher Organization (PTO) meeting. PTO members agreed to assist the students with raising awareness and funds to install the first water bottle filling station at TMS! The station will include a filtration system and is planned for the area directly outside of the "cafatorium". Funds will be raised through the sales of water bottles customized with the latest Tiverton School District logo and are BPA free with a spill proof lid. They hold 22 oz of liquid and are dishwasher safe. can be ordered through the form found on our website. Excellent way to keep single use plastics out of our oceans and landfills TMS!

* There are over 500 students at TMS, if half use a single use water bottle... at 250 per day @ 180 days per year... That is 45,000 single use water bottles going in the land fill per school year just from TMS!

Please return money with this order form to Room 145 (Mrs. Brennan, 7th grade Science) by Friday, November 16th. Check made out to "TMS" will also be accepted. Thank you for your effort in saving our planet!

Name: _____

Grade: _____ Homeroom Teacher: _____

All proceed go directly to the purchase of a new water bottle refilling station for TMS!
